Heterocyclic Compounds - The  
electron is a subatomic particle,  
symbol  $e^-$  or  $\hat{e}^-$ , whose  
electric charge is negative one  
elementary charge. Electrons  
belong to the first generation of  
the lepton particle family, and are  
generally thought to be  
elementary particles because they  
have no known components or  
substructure. Sun, 15 Apr 2018
